Q1. Which protocol is most commonly used for secure remote configuration of network devices?

- ○ A. Telnet
- ◉ B. SSH
- ○ C. FTP
- ○ D. HTTP

Your Answer: B. B. SSH
Correct Answer: B. B. SSH

Q2. Which protocol is insecure because it sends data in plaintext?

- ○ A. SSH
- ○ B. HTTPS

- ◉ C. Telnet
- ○ D. SFTP

Your Answer: C. C. Telnet
Correct Answer: C. C. Telnet

Q3. Which protocol is used to securely transfer files between systems?

- ◉ A. SFTP
- ○ B. TFTP
- ○ C. Telnet
- ○ D. SNMP

Your Answer: A. A. SFTP
Correct Answer: A. A. SFTP

Q4. Which protocol is a simple file transfer protocol often used for boot files and device configurations?

- ○ A. FTP
- ◉ B. TFTP
- ○ C. HTTPS
- ○ D. SSH

Your Answer: B. B. TFTP
Correct Answer: B. B. TFTP

Q5. Which protocol is used to securely copy files over a network?

- ◉ A. SCP

- ○ B. HTTP
- ○ C. SMTP
- ○ D. SNMP

Your Answer: A. A. SCP
Correct Answer: A. A. SCP

Q6. Which protocol is commonly used to access web-based administration pages securely?

- ○ A. HTTP
- ◉ B. HTTPS
- ○ C. Telnet
- ○ D. FTP

Your Answer: B. B. HTTPS
Correct Answer: B. B. HTTPS

Q7. Which port is used by SSH by default?

- ○ A. 21
- ◉ B. 22
- ○ C. 23
- ○ D. 80

Your Answer: B. B. 22
Correct Answer: B. B. 22

Q8. Which port is used by Telnet by default?

- ○ A. 22
- ◉ B. 23
- ○ C. 25
- ○ D. 443

Your Answer: B. B. 23
Correct Answer: B. B. 23

Q9. Which protocol is primarily used for network monitoring and device management?

- ◉ A. SNMP
- ○ B. SMTP
- ○ C. HTTP
- ○ D. DHCP

Your Answer: A. A. SNMP
Correct Answer: A. A. SNMP

Q10. Which SNMP message is used by a management station to request information from an agent?

- ○ A. Trap
- ◉ B. Get
- ○ C. Reply
- ○ D. Redirect

Your Answer: B. B. Get
Correct Answer: B. B. Get

Q11. What is the main advantage of SSH over Telnet?

- ○ A. SSH is faster
- ◉ B. SSH provides encryption
- ○ C. SSH uses no authentication
- ○ D. SSH works only on Windows

Your Answer: B. B. SSH provides encryption
Correct Answer: B. B. SSH provides encryption

Q12. Which protocol is often used for remote command-line access to network devices?

- ◉ A. SSH
- ○ B. IMAP
- ○ C. DNS
- ○ D. ARP

Your Answer: A. A. SSH
Correct Answer: A. A. SSH

Q13. Which protocol is typically used for downloading router configuration files from a server?

- ◉ A. TFTP
- ○ B. DNS
- ○ C. ICMP
- ○ D. NTP

Your Answer: A. A. TFTP

Correct Answer: A. A. TFTP

Q14. Which protocol is more secure than FTP because it encrypts the session?

- ○ A. TFTP
- ◉ B. SSH
- ○ C. SNMPv1
- ○ D. HTTP

Your Answer: B. B. SSH
Correct Answer: B. B. SSH

Q15. Which of the following is a web-based protocol used to manage and configure applications through a browser?

- ◉ A. HTTPS
- ○ B. Telnet
- ○ C. TFTP
- ○ D. ICMP

Your Answer: A. A. HTTPS
Correct Answer: A. A. HTTPS

Q16. What does DCL stand for?

- ○ A. Data Control Language
- ◉ B. Digital Command Language
- ○ C. Direct Connection Layer
- ○ D. Device Control Link

Your Answer: B. B. Digital Command Language
Correct Answer: B. B. Digital Command Language

Q17. DCL is primarily associated with which operating system?

- A. Linux
- B. Windows
- C. OpenVMS
- D. macOS

Your Answer: C. C. OpenVMS
Correct Answer: C. C. OpenVMS

Q18. What is the main purpose of DCL?

- A. To design web pages
- B. To manage and control system operations using commands
- C. To compile Java programs
- D. To create databases

Your Answer: B. B. To manage and control system operations using commands
Correct Answer: B. B. To manage and control system operations using commands

Q19. Which symbol is commonly used to indicate a DCL command line prompt?

- A. $
- B. #
- C. >

- D. %

Your Answer: A. A. $
Correct Answer: A. A. $

Q20. Which DCL command is used to display the contents of a file?

- (●) A. TYPE
- ( ) B. SHOW
- ( ) C. LIST
- ( ) D. OPEN

Your Answer: A. A. TYPE
Correct Answer: A. A. TYPE

Q21. Which DCL command is used to list files in a directory?

- (●) A. DIR
- ( ) B. TREE
- ( ) C. FILES
- ( ) D. LIST

Your Answer: A. A. DIR
Correct Answer: A. A. DIR

Q22. Which DCL command is used to view system information such as time, users, or devices?

- ( ) A. PRINT
- (●) B. SHOW

○ C. COPY

○ D. DELETE

Your Answer: B. B. SHOW
Correct Answer: B. B. SHOW

Q23. Which DCL command is used to copy files?

○ A. MOVE

◉ B. COPY

○ C. DUPLICATE

○ D. TRANSFER

Your Answer: B. B. COPY
Correct Answer: B. B. COPY

Q24. Which DCL command is used to delete a file?

○ A. REMOVE

○ B. ERASE

◉ C. DELETE

○ D. DISCARD

Your Answer: C. C. DELETE
Correct Answer: C. C. DELETE

Q25. Which DCL command is used to rename a file?

◉ A. RENAME

○ B. CHANGE

- C. MODIFY
- D. ALTER

Your Answer: A. A. RENAME
Correct Answer: A. A. RENAME

Q26. Which DCL command is used to assign a logical name to a device or file?

- A. DEFINE
- B. MAP
- C. LINK
- D. SET

Your Answer: A. A. DEFINE
Correct Answer: A. A. DEFINE

Q27. Which DCL command is used to create a new directory?

- A. CREATE/DIRECTORY
- B. MAKE/DIR
- C. NEW/DIRECTORY
- D. DIR/CREATE

Your Answer: A. A. CREATE/DIRECTORY
Correct Answer: A. A. CREATE/DIRECTORY

Q28. Which DCL command is used to execute a command procedure file?

- A. RUN

- B. EXECUTE
- C. START
- D. CALL

Your Answer: C. C. START
Correct Answer: A. A. RUN

Q29. What type of file is commonly used to store DCL command procedures?

- A. .TXT
- B. .BAT
- C. .COM
- D. .EXE

Your Answer: C. C. .COM
Correct Answer: C. C. .COM

Q30. Which of the following is a valid feature of DCL?

- A. It supports command procedures and scripting
- B. It is only used for graphics editing
- C. It works only on mobile devices
- D. It cannot automate tasks

Your Answer: A. A. It supports command procedures and scripting
Correct Answer: A. A. It supports command procedures and scripting

Q31. What is the primary purpose of a firewall?

- ○ A. To increase Internet speed
- ◉ B. To filter and control network traffic
- ○ C. To assign IP addresses
- ○ D. To store user passwords

Your Answer: B. B. To filter and control network traffic
Correct Answer: B. B. To filter and control network traffic

Q32. A firewall mainly acts as a barrier between:

- ○ A. Two printers
- ○ B. A computer and a monitor
- ◉ C. A trusted internal network and an untrusted external network
- ○ D. A keyboard and mouse

Your Answer: C. C. A trusted internal network and an untrusted external network
Correct Answer: C. C. A trusted internal network and an untrusted external network

Q33. Which of the following is a type of firewall?

- ◉ A. Packet-filtering firewall
- ○ B. Optical firewall
- ○ C. Magnetic firewall
- ○ D. Mechanical firewall

Your Answer: A. A. Packet-filtering firewall
Correct Answer: A. A. Packet-filtering firewall

Q34. Which firewall type inspects traffic at the application layer?

- ○ A. Stateless firewall
- ◉ B. Application-layer firewall
- ○ C. Hub firewall
- ○ D. Bridge firewall

Your Answer: B. B. Application-layer firewall
Correct Answer: B. B. Application-layer firewall

Q35. What does a stateful firewall do?

- ○ A. Ignores connection status
- ◉ B. Tracks the state of active connections
- ○ C. Only blocks emails
- ○ D. Works only on wireless networks

Your Answer: B. B. Tracks the state of active connections
Correct Answer: B. B. Tracks the state of active connections

Q36. Which firewall is implemented as software on a host machine?

- ○ A. Hardware firewall
- ◉ B. Personal firewall
- ○ C. Cloud firewall
- ○ D. Router firewall

Your Answer: B. B. Personal firewall
Correct Answer: B. B. Personal firewall

Q37. Which of the following best describes a hardware firewall?

- ○ A. A firewall built into a motherboard
- ◉ B. A physical device placed between networks
- ○ C. A software update
- ○ D. A password manager

Your Answer: B. B. A physical device placed between networks
Correct Answer: B. B. A physical device placed between networks

Q38. What is a common rule used by firewalls?

- ○ A. Allow all traffic always
- ◉ B. Block or permit traffic based on IP, port, or protocol
- ○ C. Change file extensions
- ○ D. Compress network packets

Your Answer: B. B. Block or permit traffic based on IP, port, or protocol
Correct Answer: B. B. Block or permit traffic based on IP, port, or protocol

Q39. Which of the following ports is commonly used for HTTPS traffic and may be allowed by a firewall?

- ○ A. 21
- ○ B. 22
- ○ C. 80
- ◉ D. 443

Your Answer: D. D. 443
Correct Answer: D. D. 443

Q40. Which protocol is commonly used for remote login and may be restricted by a firewall?

- ○ A. FTP
- ◉ B. Telnet
- ○ C. DHCP
- ○ D. ARP

Your Answer: B. B. Telnet
Correct Answer: B. B. Telnet

Q41. What does “default deny” mean in firewall configuration?

- ◉ A. Block all traffic unless specifically allowed
- ○ B. Allow all traffic unless specifically blocked
- ○ C. Deny only email traffic
- ○ D. Deny only local traffic

Your Answer: A. A. Block all traffic unless specifically allowed
Correct Answer: A. A. Block all traffic unless specifically allowed

Q42. What is a demilitarized zone (DMZ) in firewall design?

- ○ A. A private user folder
- ◉ B. A buffer network between internal and external networks
- ○ C. A type of router cable
- ○ D. A wireless channel

Your Answer: B. B. A buffer network between internal and external networks
Correct Answer: B. B. A buffer network between internal and external networks

Q43. Which firewall feature helps detect and block suspicious traffic patterns?

- (●) A. Traffic analysis and intrusion detection
- ( ) B. File renaming
- ( ) C. Screen resolution control
- ( ) D. Disk formatting

Your Answer: A. A. Traffic analysis and intrusion detection
Correct Answer: A. A. Traffic analysis and intrusion detection

Q44. Which of the following is a benefit of using a firewall?

- ( ) A. Prevents all cyberattacks
- (●) B. Controls unauthorized access to networks
- ( ) C. Increases monitor size
- ( ) D. Replaces antivirus software completely

Your Answer: B. B. Controls unauthorized access to networks
Correct Answer: B. B. Controls unauthorized access to networks

Q45. Which device often includes firewall functionality in home networks?

- ( ) A. Keyboard
- (●) B. Router
- ( ) C. Scanner
- ( ) D. Printer

Your Answer: B. B. Router

Correct Answer: B. B. Router

Q46. What does IEEE stand for?

- ○ A. International Electronics and Engineering
- ◉ B. Institute of Electrical and Electronics Engineers
- ○ C. Internet Engineering and Electrical Equipment
- ○ D. Integrated Electronics and Engineering

Your Answer: B. B. Institute of Electrical and Electronics Engineers
Correct Answer: B. B. Institute of Electrical and Electronics Engineers

Q47. Which IEEE standard is commonly associated with Ethernet?

- ○ A. 802.11
- ◉ B. 802.3
- ○ C. 802.15
- ○ D. 802.16

Your Answer: B. B. 802.3
Correct Answer: B. B. 802.3

Q48. Which IEEE standard defines Wi-Fi networks?

- ○ A. 802.1Q
- ○ B. 802.3
- ◉ C. 802.11
- ○ D. 802.5

Your Answer: C. C. 802.11
Correct Answer: C. C. 802.11

Q49. Which IEEE standard is related to VLAN tagging?

- (●) A. 802.1Q
- ( ) B. 802.11
- ( ) C. 802.3af
- ( ) D. 802.15

Your Answer: A. A. 802.1Q
Correct Answer: A. A. 802.1Q

Q50. Which IEEE standard is commonly used for wireless personal area networks such as Bluetooth?

- (●) A. 802.15
- ( ) B. 802.1D
- ( ) C. 802.3
- ( ) D. 802.11

Your Answer: A. A. 802.15
Correct Answer: A. A. 802.15

Q51. IEEE 802 standards are mainly related to:

- (●) A. Networking and local area communication
- ( ) B. Database management
- ( ) C. Operating system licensing

- ○ D. Programming language design

Your Answer: A. A. Networking and local area communication
Correct Answer: A. A. Networking and local area communication

Q52. Which standard is associated with Fast Ethernet?

- ◉ A. 802.3u
- ○ B. 802.1X
- ○ C. 802.11ac
- ○ D. 802.15.4

Your Answer: A. A. 802.3u
Correct Answer: A. A. 802.3u

Q53. Which IEEE standard defines Spanning Tree Protocol in bridged networks?

- ◉ A. 802.1D
- ○ B. 802.1Q
- ○ C. 802.11n
- ○ D. 802.3ab

Your Answer: A. A. 802.1D
Correct Answer: A. A. 802.1D

Q54. Which IEEE standard is used for authentication in port-based network access control?

- ◉ A. 802.1X
- ○ B. 802.3z

- ○ C. 802.11b
- ○ D. 802.16

Your Answer: A. A. 802.1X
Correct Answer: A. A. 802.1X

Q55. Which of the following is an IEEE networking standard group?

- ○ A. 800 series
- ○ B. 801 series
- ◉ C. 802 series
- ○ D. 803 series

Your Answer: C. C. 802 series
Correct Answer: C. C. 802 series

Q56. Which IEEE standard is associated with gigabit Ethernet?

- ◉ A. 802.3ab
- ○ B. 802.11a
- ○ C. 802.15.1
- ○ D. 802.1p

Your Answer: A. A. 802.3ab
Correct Answer: A. A. 802.3ab

Q57. Which IEEE standard is commonly used for QoS priority tagging?

- ◉ A. 802.1p
- ○ B. 802.1Q

○ C. 802.3ad

○ D. 802.11e

Your Answer: A. A. 802.1p
Correct Answer: A. A. 802.1p

Q58. Which IEEE standard is used for wireless LAN enhancements to support QoS?

◉ A. 802.11e

○ B. 802.3ae

○ C. 802.1D

○ D. 802.15.3

Your Answer: A. A. 802.11e
Correct Answer: A. A. 802.11e

Q59. Which IEEE standard defines 10 Gigabit Ethernet?

◉ A. 802.3ae

○ B. 802.3af

○ C. 802.11g

○ D. 802.1X

Your Answer: A. A. 802.3ae
Correct Answer: A. A. 802.3ae

Q60. What is the main role of IEEE standards in networking?

◉ A. To provide common guidelines for interoperability

- ○ B. To assign public IP addresses
- ○ C. To replace routers
- ○ D. To encrypt all packets automatically

Your Answer: A. A. To provide common guidelines for interoperability
Correct Answer: A. A. To provide common guidelines for interoperability

Q61. What is the primary purpose of an IP address?

- ○ A. To identify a printer only
- ◉ B. To uniquely identify a device on a network
- ○ C. To encrypt data
- ○ D. To speed up Internet access

Your Answer: B. B. To uniquely identify a device on a network
Correct Answer: B. B. To uniquely identify a device on a network

Q62. How many bits are in an IPv4 address?

- ○ A. 16
- ◉ B. 32
- ○ C. 64
- ○ D. 128

Your Answer: B. B. 32
Correct Answer: B. B. 32

Q63. How many bits are in an IPv6 address?

- ○ A. 32

- B. 64
- C. 96
- D. 128

Your Answer: D. D. 128
Correct Answer: D. D. 128

Q64. Which of the following is an IPv4 address?

- A. 2001:0db8::1
- B. 192.168.1.10
- C. FE80::0202:B3FF:FE1E:8329
- D. 12345::6789

Your Answer: B. B. 192.168.1.10
Correct Answer: B. B. 192.168.1.10

Q65. Which address is a private IPv4 address?

- A. 8.8.8.8
- B. 172.16.5.4
- C. 1.1.1.1
- D. 100.64.0.1

Your Answer: B. B. 172.16.5.4
Correct Answer: B. B. 172.16.5.4

Q66. Which of the following is the private IP range for Class C?

- A. 10.0.0.0 to 10.255.255.255

- B. 172.16.0.0 to 172.31.255.255
- C. 192.168.0.0 to 192.168.255.255
- D. 224.0.0.0 to 239.255.255.255

Your Answer: C. C. 192.168.0.0 to 192.168.255.255
Correct Answer: C. C. 192.168.0.0 to 192.168.255.255

Q67. What is the default subnet mask for a Class C IPv4 network?

- A. 255.0.0.0
- B. 255.255.0.0
- C. 255.255.255.0
- D. 255.255.255.255

Your Answer: C. C. 255.255.255.0
Correct Answer: C. C. 255.255.255.0

Q68. Which IP address class is used for multicast?

- A. Class A
- B. Class B
- C. Class C
- D. Class D

Your Answer: D. D. Class D
Correct Answer: D. D. Class D

Q69. What is a subnet mask used for?

- A. To hide email addresses

- (●) B. To separate network and host portions of an IP address
- ( ) C. To assign MAC addresses
- ( ) D. To block viruses

Your Answer: B. B. To separate network and host portions of an IP address
Correct Answer: B. B. To separate network and host portions of an IP address

Q70. Which of the following is a loopback address in IPv4?

- ( ) A. 192.168.0.1
- (●) B. 127.0.0.1
- ( ) C. 169.254.1.1
- ( ) D. 10.10.10.10

Your Answer: B. B. 127.0.0.1
Correct Answer: B. B. 127.0.0.1

Q71. What does DHCP do in relation to IP addressing?

- ( ) A. Encrypts IP packets
- (●) B. Assigns IP addresses automatically
- ( ) C. Converts domain names to IP addresses
- ( ) D. Blocks unauthorized traffic

Your Answer: B. B. Assigns IP addresses automatically
Correct Answer: B. B. Assigns IP addresses automatically

Q72. Which address type refers to a single device on a network?

- ( ) A. Broadcast address

- ○ B. Multicast address
- ◉ C. Unicast address
- ○ D. Anycast address

Your Answer: C. C. Unicast address
Correct Answer: C. C. Unicast address

Q73. What is the purpose of a broadcast address?

- ○ A. To send data to one specific device
- ◉ B. To send data to all devices on a network
- ○ C. To encrypt traffic
- ○ D. To assign a subnet mask

Your Answer: B. B. To send data to all devices on a network
Correct Answer: B. B. To send data to all devices on a network

Q74. Which IPv6 address type is used to send traffic to the nearest of a group of devices?

- ○ A. Unicast
- ○ B. Broadcast
- ◉ C. Anycast
- ○ D. Multicast only

Your Answer: C. C. Anycast
Correct Answer: C. C. Anycast

Q75. Which tool is commonly used to view IP configuration on a Windows system?

- ○ A. ping
- ◉ B. ipconfig
- ○ C. tracert
- ○ D. netstat

Your Answer: B. B. ipconfig
Correct Answer: B. B. ipconfig

Q76. What is a LAN?

- ○ A. A network that covers a large country
- ◉ B. A network that connects devices over a small geographic area
- ○ C. A satellite communication system
- ○ D. A network used only for mobile phones

Your Answer: D. D. A network used only for mobile phones
Correct Answer: B. B. A network that connects devices over a small geographic area

Q77. Which device is commonly used to connect devices in a LAN?

- ○ A. Router
- ◉ B. Switch
- ○ C. Modem
- ○ D. Repeater only

Your Answer: B. B. Switch
Correct Answer: B. B. Switch

Q78. What is one main advantage of a LAN?

- ○ A. Very high cost
- ◉ B. Fast communication between connected devices
- ○ C. No need for cables ever
- ○ D. Cannot share resources

Your Answer: B. B. Fast communication between connected devices
Correct Answer: B. B. Fast communication between connected devices

Q79. Which of the following is a common LAN resource?

- ◉ A. Printer
- ○ B. Satellite dish
- ○ C. Undersea cable
- ○ D. Cell tower

Your Answer: A. A. Printer
Correct Answer: A. A. Printer

Q80. Which topology is most commonly used in modern LANs?

- ○ A. Ring
- ○ B. Bus
- ◉ C. Star
- ○ D. Mesh only

Your Answer: C. C. Star
Correct Answer: C. C. Star

Q81. In a star LAN topology, all devices are connected to:

- ○ A. Another end device
- ◉ B. A central switch or hub
- ○ C. A modem only
- ○ D. The Internet service provider

Your Answer: B. B. A central switch or hub
Correct Answer: B. B. A central switch or hub

Q82. What is the typical maximum area covered by a LAN?

- ◉ A. A building or campus
- ○ B. An entire continent
- ○ C. The whole world
- ○ D. Multiple countries

Your Answer: A. A. A building or campus
Correct Answer: A. A. A building or campus

Q83. Which protocol is often used in LAN communication for sharing and managing data?

- ◉ A. Ethernet
- ○ B. SMTP
- ○ C. POP3
- ○ D. SNMP only

Your Answer: A. A. Ethernet
Correct Answer: A. A. Ethernet

Q84. What is a key design goal in a LAN?

- ○ A. Slow communication
- ◉ B. Resource sharing and efficient data transfer
- ○ C. Increasing packet loss
- ○ D. Reducing device connectivity

Your Answer: B. B. Resource sharing and efficient data transfer
Correct Answer: B. B. Resource sharing and efficient data transfer

Q85. Which device forwards data only to the intended device in a LAN?

- ◉ A. Switch
- ○ B. Hub
- ○ C. Repeater
- ○ D. Bridge only

Your Answer: A. A. Switch
Correct Answer: A. A. Switch

Q86. Which of the following is a wired LAN medium?

- ○ A. Wi-Fi
- ◉ B. Ethernet cable
- ○ C. Bluetooth
- ○ D. Infrared

Your Answer: B. B. Ethernet cable
Correct Answer: B. B. Ethernet cable

Q87. What is the purpose of LAN segmentation?

- ○ A. To make network traffic slower
- ◉ B. To improve performance and security
- ○ C. To remove switches from the network
- ○ D. To eliminate IP addressing

Your Answer: B. B. To improve performance and security
Correct Answer: B. B. To improve performance and security

Q88. Which network service is commonly shared in a LAN?

- ◉ A. Local file storage
- ○ B. Ocean communication
- ○ C. Space signals
- ○ D. Satellite launch control

Your Answer: A. A. Local file storage
Correct Answer: A. A. Local file storage

Q89. Which of the following best describes a LAN administrator's role?

- ◉ A. Managing network devices, security, and connectivity
- ○ B. Designing aircraft engines
- ○ C. Writing movie scripts
- ○ D. Repairing roads

Your Answer: A. A. Managing network devices, security, and connectivity
Correct Answer: A. A. Managing network devices, security, and connectivity

Q90. Why are switches preferred over hubs in LAN design?

- ○ A. Switches send traffic to all devices always
- ◉ B. Switches reduce collisions and improve efficiency
- ○ C. Switches eliminate the need for IP addresses
- ○ D. Switches work only with wireless networks

Your Answer: B. B. Switches reduce collisions and improve efficiency
Correct Answer: B. B. Switches reduce collisions and improve efficiency

Q91. What is a network protocol?

- ○ A. A physical cable type
- ◉ B. A set of rules for communication between devices
- ○ C. A software firewall
- ○ D. A type of IP address

Your Answer: B. B. A set of rules for communication between devices
Correct Answer: B. B. A set of rules for communication between devices

Q92. Which protocol is used to browse websites?

- ○ A. FTP
- ◉ B. HTTP
- ○ C. SMTP
- ○ D. ICMP

Your Answer: B. B. HTTP
Correct Answer: B. B. HTTP

Q93. Which secure version of HTTP is used for encrypted web communication?

- A. FTP
- B. HTTPS
- C. Telnet
- D. SNMP

Your Answer: B. B. HTTPS
Correct Answer: B. B. HTTPS

Q94. Which protocol is used to send email?

- A. SMTP
- B. POP3
- C. IMAP
- D. DNS

Your Answer: A. A. SMTP
Correct Answer: A. A. SMTP

Q95. Which protocol is used to receive and store email on a mail server while keeping it synchronized?

- A. SMTP
- B. POP3
- C. IMAP
- D. ARP

Your Answer: B. B. POP3

Correct Answer: C. C. IMAP

Q96. Which protocol is used to automatically assign IP addresses to hosts?

- ○ A. DNS
- ◉ B. DHCP
- ○ C. ICMP
- ○ D. TCP

Your Answer: B. B. DHCP
Correct Answer: B. B. DHCP

Q97. Which protocol translates domain names into IP addresses?

- ◉ A. DNS
- ○ B. ARP
- ○ C. FTP
- ○ D. NTP

Your Answer: A. A. DNS
Correct Answer: A. A. DNS

Q98. Which protocol is used to resolve a MAC address from an IP address in a local network?

- ◉ A. ARP
- ○ B. DNS
- ○ C. TCP
- ○ D. UDP

Your Answer: A. A. ARP
Correct Answer: A. A. ARP

Q99. Which protocol is connection-oriented?

- ○ A. UDP
- ◉ B. TCP
- ○ C. ICMP
- ○ D. ARP

Your Answer: B. B. TCP
Correct Answer: B. B. TCP

Q100. Which protocol is connectionless and faster for simple data transfer?

- ○ A. TCP
- ◉ B. UDP
- ○ C. HTTP
- ○ D. FTP

Your Answer: B. B. UDP
Correct Answer: B. B. UDP

Q101. Which protocol is used for testing connectivity between devices?

- ○ A. NTP
- ◉ B. ICMP
- ○ C. SNMP

- ○ D. POP3

Your Answer: B. B. ICMP
Correct Answer: B. B. ICMP

Q102. Which protocol is used to transfer files over a network?

- ◉ A. FTP
- ○ B. DNS
- ○ C. ICMP
- ○ D. ARP

Your Answer: A. A. FTP
Correct Answer: A. A. FTP

Q103. Which protocol is used to synchronize clocks on devices?

- ○ A. SNMP
- ◉ B. NTP
- ○ C. DHCP
- ○ D. SMTP

Your Answer: B. B. NTP
Correct Answer: B. B. NTP

Q104. Which protocol works at the Transport layer and ensures reliable delivery?

- ◉ A. TCP
- ○ B. IP

○ C. ARP

○ D. Ethernet

Your Answer: A. A. TCP
Correct Answer: A. A. TCP

Q105. Which protocol is used for remote terminal access but is considered insecure?

○ A. SSH

◉ B. Telnet

○ C. HTTPS

○ D. DNS

Your Answer: B. B. Telnet
Correct Answer: B. B. Telnet

Q106. What is network topology?

○ A. The type of IP address used on a network

◉ B. The physical or logical arrangement of devices in a network

○ C. A method of encrypting data

○ D. A router configuration command

Your Answer: B. B. The physical or logical arrangement of devices in a network
Correct Answer: B. B. The physical or logical arrangement of devices in a network

Q107. Which topology uses a central device to connect all nodes?

○ A. Bus

- ○ B. Ring
- ◉ C. Star
- ○ D. Mesh

Your Answer: C. C. Star
Correct Answer: C. C. Star

Q108. In which topology are devices connected in a closed loop?

- ○ A. Bus
- ◉ B. Ring
- ○ C. Star
- ○ D. Tree

Your Answer: B. B. Ring
Correct Answer: B. B. Ring

Q109. Which topology uses a single main cable to connect all devices?

- ◉ A. Bus
- ○ B. Mesh
- ○ C. Star
- ○ D. Hybrid

Your Answer: A. A. Bus
Correct Answer: A. A. Bus

Q110. Which topology provides high redundancy by connecting each device to multiple others?

- ○ A. Bus
- ○ B. Ring
- ◉ C. Mesh
- ○ D. Star

Your Answer: C. C. Mesh
Correct Answer: C. C. Mesh

Q111. What is a major disadvantage of a bus topology?

- ○ A. High cost
- ○ B. Easy troubleshooting
- ◉ C. A single cable failure can affect the whole network
- ○ D. Requires many switches

Your Answer: C. C. A single cable failure can affect the whole network
Correct Answer: C. C. A single cable failure can affect the whole network

Q112. What is one advantage of a star topology?

- ○ A. No central device required
- ◉ B. Easy to manage and troubleshoot
- ○ C. Uses the least amount of cable
- ○ D. All devices directly communicate without a switch

Your Answer: B. B. Easy to manage and troubleshoot
Correct Answer: B. B. Easy to manage and troubleshoot

Q113. Which topology combines two or more different topologies?

- (●) A. Hybrid
- ( ) B. Ring
- ( ) C. Bus
- ( ) D. Point-to-point

Your Answer: A. A. Hybrid
Correct Answer: A. A. Hybrid

Q114. Which topology is most commonly used in modern Ethernet LANs?

- ( ) A. Bus
- (●) B. Star
- ( ) C. Ring
- ( ) D. Linear

Your Answer: B. B. Star
Correct Answer: B. B. Star

Q115. What is the main drawback of a ring topology?

- ( ) A. It requires no cables
- (●) B. A break in the ring can disrupt network communication
- ( ) C. It is impossible to install
- ( ) D. It cannot support data transmission

Your Answer: B. B. A break in the ring can disrupt network communication
Correct Answer: B. B. A break in the ring can disrupt network communication

Q116. Which topology connects every node to every other node directly?

- A. Bus
- B. Mesh
- C. Ring
- D. Tree

Your Answer: C. C. Ring
Correct Answer: B. B. Mesh

Q117. Which topology is easiest to expand?

- A. Bus
- B. Star
- C. Ring
- D. Point-to-point

Your Answer: B. B. Star
Correct Answer: B. B. Star

Q118. What does “logical topology” describe?

- A. The physical shape of the cables only
- B. The way data flows in a network
- C. The type of router used
- D. The number of IP addresses

Your Answer: B. B. The way data flows in a network
Correct Answer: B. B. The way data flows in a network

Q119. Which topology is a combination of bus and star?

- ○ A. Ring
- ◉ B. Tree
- ○ C. Mesh
- ○ D. Point-to-point

Your Answer: B. B. Tree
Correct Answer: B. B. Tree

Q120. What is a key advantage of mesh topology?

- ○ A. Low redundancy
- ◉ B. High reliability and fault tolerance
- ○ C. Requires only one connection
- ○ D. No routing needed

Your Answer: B. B. High reliability and fault tolerance
Correct Answer: B. B. High reliability and fault tolerance

Q121. What is the primary purpose of NTP?

- ○ A. To assign IP addresses
- ◉ B. To synchronize time across network devices
- ○ C. To transfer files
- ○ D. To block unauthorized access

Your Answer: B. B. To synchronize time across network devices
Correct Answer: B. B. To synchronize time across network devices

Q122. NTP stands for:

- ○ A. Network Transfer Protocol
- ◉ B. Network Time Protocol
- ○ C. New Transmission Process
- ○ D. Node Time Processing

Your Answer: B. B. Network Time Protocol
Correct Answer: B. B. Network Time Protocol

Q123. Why is time synchronization important in networks?

- ○ A. It increases monitor resolution
- ◉ B. It helps with logging, security, and event correlation
- ○ C. It changes IP addresses automatically
- ○ D. It reduces cable length

Your Answer: B. B. It helps with logging, security, and event correlation
Correct Answer: B. B. It helps with logging, security, and event correlation

Q124. Which protocol port is commonly used by NTP?

- ○ A. 21
- ○ B. 22
- ◉ C. 123
- ○ D. 443

Your Answer: C. C. 123
Correct Answer: C. C. 123

Q125. NTP operates mainly over which transport protocol?

- ○ A. TCP
- ◉ B. UDP
- ○ C. ICMP
- ○ D. ARP

Your Answer: A. A. TCP
Correct Answer: B. B. UDP

Q126. What kind of devices can act as NTP clients?

- ○ A. Only servers
- ○ B. Only routers
- ◉ C. Any network device needing time synchronization
- ○ D. Only switches

Your Answer: C. C. Any network device needing time synchronization
Correct Answer: C. C. Any network device needing time synchronization

Q127. Which device typically provides the accurate time source for NTP?

- ○ A. Printer
- ◉ B. Time server
- ○ C. DHCP server
- ○ D. File server

Your Answer: B. B. Time server
Correct Answer: B. B. Time server

Q128. What is a stratum in NTP?

- ○ A. A type of cable
- ◉ B. A level of distance from the reference time source
- ○ C. A firewall rule
- ○ D. An IP class

Your Answer: B. B. A level of distance from the reference time source
Correct Answer: B. B. A level of distance from the reference time source

Q129. Which of the following is an example of a reference time source for NTP?

- ○ A. Router buffer
- ◉ B. Atomic clock
- ○ C. Switch port
- ○ D. DNS server

Your Answer: B. B. Atomic clock
Correct Answer: B. B. Atomic clock

Q130. What happens if network devices have incorrect time settings?

- ○ A. Better bandwidth
- ◉ B. Problems with logs, authentication, and certificates
- ○ C. Faster IP routing
- ○ D. More Wi-Fi signals

Your Answer: B. B. Problems with logs, authentication, and certificates
Correct Answer: B. B. Problems with logs, authentication, and certificates

Q131. Which command is commonly used to check time synchronization on many systems?

- A. ping
- B. ntpq
- C. tracert
- D. ipconfig

Your Answer: B. B. ntpq
Correct Answer: B. B. ntpq

Q132. NTP is mainly used in:

- A. Video editing only
- B. Distributed systems and networked environments
- C. Printer repair
- D. File compression

Your Answer: B. B. Distributed systems and networked environments
Correct Answer: B. B. Distributed systems and networked environments

Q133. Which of the following is a benefit of NTP?

- A. It removes the need for routers
- B. It keeps devices synchronized to the same time standard
- C. It blocks malware
- D. It increases network cable speed

Your Answer: B. B. It keeps devices synchronized to the same time standard
Correct Answer: B. B. It keeps devices synchronized to the same time standard

Q134. Which layer of networking does NTP use for communication?

- (●) A. Application layer
- ( ) B. Data link layer
- ( ) C. Physical layer
- ( ) D. Network access layer only

Your Answer: A. A. Application layer
Correct Answer: A. A. Application layer

Q135. Which statement about NTP is correct?

- ( ) A. It is used for file transfer
- (●) B. It is used to synchronize clocks across a network
- ( ) C. It is used to encrypt emails
- ( ) D. It is used to assign MAC addresses

Your Answer: B. B. It is used to synchronize clocks across a network
Correct Answer: B. B. It is used to synchronize clocks across a network

Q136. What does OSI stand for?

- ( ) A. Open System Internet
- ( ) B. Operating System Interface
- (●) C. Open Systems Interconnection
- ( ) D. Optical Signal Integration

Your Answer: C. C. Open Systems Interconnection
Correct Answer: C. C. Open Systems Interconnection

Q137. How many layers are there in the OSI model?

- ○ A. 4
- ○ B. 5
- ○ C. 6
- ◉ D. 7

Your Answer: D. D. 7
Correct Answer: D. D. 7

Q138. Which OSI layer is responsible for physical transmission of bits over a medium?

- ○ A. Transport
- ○ B. Network
- ◉ C. Physical
- ○ D. Session

Your Answer: C. C. Physical
Correct Answer: C. C. Physical

Q139. Which OSI layer is responsible for MAC addressing and switching?

- ◉ A. Data Link
- ○ B. Transport
- ○ C. Session
- ○ D. Presentation

Your Answer: A. A. Data Link

Correct Answer: A. A. Data Link

Q140. Which OSI layer is responsible for routing packets between networks?

- ○ A. Application
- ◉ B. Network
- ○ C. Transport
- ○ D. Physical

Your Answer: B. B. Network
Correct Answer: B. B. Network

Q141. Which OSI layer provides end-to-end communication and reliability?

- ○ A. Data Link
- ◉ B. Transport
- ○ C. Session
- ○ D. Presentation

Your Answer: B. B. Transport
Correct Answer: B. B. Transport

Q142. Which OSI layer manages sessions between applications?

- ◉ A. Session
- ○ B. Network
- ○ C. Physical
- ○ D. Data Link

Your Answer: A. A. Session
Correct Answer: A. A. Session

Q143. Which OSI layer is responsible for data translation, encryption, and compression?

- (●) A. Presentation
- ( ) B. Network
- ( ) C. Transport
- ( ) D. Physical

Your Answer: A. A. Presentation
Correct Answer: A. A. Presentation

Q144. Which OSI layer provides services directly to end-user applications?

- ( ) A. Session
- (●) B. Application
- ( ) C. Transport
- ( ) D. Data Link

Your Answer: B. B. Application
Correct Answer: B. B. Application

Q145. Which of the following is a Layer 2 device?

- ( ) A. Router
- (●) B. Switch
- ( ) C. Gateway

○ D. Modem

Your Answer: B. B. Switch
Correct Answer: B. B. Switch

Q146. Which of the following is a Layer 3 device?

○ A. Hub

○ B. Repeater

◉ C. Router

○ D. Switch

Your Answer: C. C. Router
Correct Answer: C. C. Router

Q147. At which OSI layer does IP operate?

○ A. Physical

◉ B. Network

○ C. Transport

○ D. Application

Your Answer: B. B. Network
Correct Answer: B. B. Network

Q148. At which OSI layer does TCP operate?

○ A. Network

◉ B. Transport

○ C. Session

- ○ D. Data Link

Your Answer: B. B. Transport
Correct Answer: B. B. Transport

Q149. Which OSI layer is closest to the user?

- ○ A. Physical
- ○ B. Network
- ◉ C. Application
- ○ D. Data Link

Your Answer: C. C. Application
Correct Answer: C. C. Application

Q150. Which statement about the OSI model is correct?

- ○ A. It has 5 layers
- ○ B. It is used only for wireless networks
- ◉ C. It is a conceptual framework for understanding network communication
- ○ D. It replaces TCP/IP completely

Your Answer: C. C. It is a conceptual framework for understanding network communication
Correct Answer: C. C. It is a conceptual framework for understanding network communication

Q151. What is the main function of a proxy server?

- ○ A. To increase monitor brightness
- ◉ B. To act as an intermediary between client and server

○ C. To assign MAC addresses

○ D. To replace the router

Your Answer: B. B. To act as an intermediary between client and server
Correct Answer: B. B. To act as an intermediary between client and server

Q152. A proxy server is typically used to:

○ A. Directly connect all devices without control

◉ B. Control, filter, and forward client requests

○ C. Increase cable length

○ D. Encrypt hard disks only

Your Answer: B. B. Control, filter, and forward client requests
Correct Answer: B. B. Control, filter, and forward client requests

Q153. Which of the following is a benefit of using a proxy server?

○ A. Reduces security

◉ B. Hides internal IP addresses

○ C. Deletes browsing history automatically on all devices

○ D. Prevents all Internet access

Your Answer: B. B. Hides internal IP addresses
Correct Answer: B. B. Hides internal IP addresses

Q154. Which proxy type is commonly used to improve access speed by storing frequently requested content?

○ A. Reverse proxy

- ○ B. Caching proxy
- ◉ C. Transparent proxy
- ○ D. SOCKS proxy

Your Answer: C. C. Transparent proxy
Correct Answer: B. B. Caching proxy

Q155. Which proxy sits between external clients and internal servers?

- ○ A. Forward proxy
- ◉ B. Reverse proxy
- ○ C. Caching proxy
- ○ D. Open proxy

Your Answer: B. B. Reverse proxy
Correct Answer: B. B. Reverse proxy

Q156. Which proxy is used by clients to access the Internet on their behalf?

- ◉ A. Forward proxy
- ○ B. Reverse proxy
- ○ C. Load balancer
- ○ D. DNS proxy

Your Answer: A. A. Forward proxy
Correct Answer: A. A. Forward proxy

Q157. What is one security advantage of a proxy server?

- ○ A. It increases packet loss
- ◉ B. It can block access to malicious websites
- ○ C. It removes the need for passwords
- ○ D. It disables encryption

Your Answer: B. B. It can block access to malicious websites
Correct Answer: B. B. It can block access to malicious websites

Q158. Which protocol is often used by proxy servers to handle web traffic?

- ◉ A. HTTP/HTTPS
- ○ B. SMTP
- ○ C. ARP
- ○ D. ICMP

Your Answer: A. A. HTTP/HTTPS
Correct Answer: A. A. HTTP/HTTPS

Q159. What does a transparent proxy do?

- ◉ A. Requires no user configuration and intercepts requests automatically
- ○ B. Encrypts all traffic end-to-end
- ○ C. Only works with email
- ○ D. Replaces the switch

Your Answer: A. A. Requires no user configuration and intercepts requests automatically
Correct Answer: A. A. Requires no user configuration and intercepts requests automatically

Q160. A proxy server can help organizations by:

- (●) A. Monitoring and controlling employee Internet usage
- ( ) B. Eliminating the need for firewalls
- ( ) C. Disabling all routing protocols
- ( ) D. Increasing the number of MAC addresses

Your Answer: A. A. Monitoring and controlling employee Internet usage
Correct Answer: A. A. Monitoring and controlling employee Internet usage

Q161. Which proxy feature helps reduce bandwidth usage?

- (●) A. Caching frequently accessed content
- ( ) B. Deleting network logs
- ( ) C. Changing IP addresses every second
- ( ) D. Blocking DNS completely

Your Answer: A. A. Caching frequently accessed content
Correct Answer: A. A. Caching frequently accessed content

Q162. Which of the following is a reverse proxy commonly used for?

- (●) A. Protecting backend servers and balancing traffic
- ( ) B. Assigning IP addresses
- ( ) C. Connecting wireless devices directly
- ( ) D. Sending email messages

Your Answer: A. A. Protecting backend servers and balancing traffic
Correct Answer: A. A. Protecting backend servers and balancing traffic

Q163. Which proxy type can hide the real destination server from clients?

- ○ A. Forward proxy
- ◉ B. Reverse proxy
- ○ C. FTP proxy
- ○ D. DHCP proxy

Your Answer: B. B. Reverse proxy
Correct Answer: B. B. Reverse proxy

Q164. What is an open proxy?

- ○ A. A proxy only for internal use
- ◉ B. A publicly accessible proxy server
- ○ C. A proxy that works only with Wi-Fi
- ○ D. A proxy built into a printer

Your Answer: B. B. A publicly accessible proxy server
Correct Answer: B. B. A publicly accessible proxy server

Q165. Which of the following is true about a proxy server?

- ○ A. It cannot filter traffic
- ○ B. It always slows down all communication
- ◉ C. It can provide anonymity and security controls
- ○ D. It works only in LANs

Your Answer: C. C. It can provide anonymity and security controls
Correct Answer: C. C. It can provide anonymity and security controls

Q166. What is the first step in basic network device configuration?

- ○ A. Change the wallpaper
- ◉ B. Assign a hostname
- ○ C. Install games
- ○ D. Disable all ports

Your Answer: B. B. Assign a hostname
Correct Answer: B. B. Assign a hostname

Q167. Why is a hostname important on a network device?

- ○ A. It increases Internet speed
- ◉ B. It helps identify the device on the network
- ○ C. It replaces the IP address
- ○ D. It encrypts traffic

Your Answer: B. B. It helps identify the device on the network
Correct Answer: B. B. It helps identify the device on the network

Q168. Which command is commonly used to configure a device's IP address on a Cisco router interface?

- ◉ A. ip address
- ○ B. set ip
- ○ C. route add
- ○ D. net ip

Your Answer: A. A. ip address
Correct Answer: A. A. ip address

Q169. What is the purpose of a subnet mask in basic configuration?

- ○ A. To hide file names
- ◉ B. To define network and host portions of an IP address
- ○ C. To block viruses
- ○ D. To speed up Wi-Fi only

Your Answer: B. B. To define network and host portions of an IP address
Correct Answer: B. B. To define network and host portions of an IP address

Q170. Which command is commonly used to save the running configuration in Cisco devices?

- ◉ A. write memory
- ○ B. show config
- ○ C. save file
- ○ D. copy start run

Your Answer: A. A. write memory
Correct Answer: A. A. write memory

Q171. What is the purpose of the default gateway?

- ○ A. To connect to a printer
- ◉ B. To provide access to other networks
- ○ C. To assign MAC addresses
- ○ D. To store passwords

Your Answer: B. B. To provide access to other networks
Correct Answer: B. B. To provide access to other networks

Q172. Which configuration is needed for remote management of a network device?

- ○ A. VLAN only
- ◉ B. Console or VTY access settings
- ○ C. Hard disk formatting
- ○ D. Screen calibration

Your Answer: B. B. Console or VTY access settings
Correct Answer: B. B. Console or VTY access settings

Q173. Which protocol is often used for secure remote administration?

- ○ A. Telnet
- ◉ B. SSH
- ○ C. FTP
- ○ D. DHCP

Your Answer: B. B. SSH
Correct Answer: B. B. SSH

Q174. What is the purpose of an enable password or enable secret on a router?

- ○ A. To change the device name
- ◉ B. To protect privileged access
- ○ C. To set the DNS server
- ○ D. To assign an IP address

Your Answer: B. B. To protect privileged access

Correct Answer: B. B. To protect privileged access

Q175. Which command is commonly used to view the current configuration on a Cisco device?

- (●) A. show running-config
- ( ) B. config show
- ( ) C. view config
- ( ) D. display settings

Your Answer: A. A. show running-config
Correct Answer: A. A. show running-config

Q176. What does interface configuration usually include?

- (●) A. IP address and subnet mask
- ( ) B. Monitor resolution
- ( ) C. Printer driver
- ( ) D. Browser settings

Your Answer: A. A. IP address and subnet mask
Correct Answer: A. A. IP address and subnet mask

Q177. What is the purpose of a banner message on a network device?

- ( ) A. To show advertisements
- (●) B. To display a login or warning message
- ( ) C. To increase speed
- ( ) D. To assign VLANs

Your Answer: B. B. To display a login or warning message
Correct Answer: B. B. To display a login or warning message

Q178. Which command is used to test connectivity to another device?

- (●) A. ping
- ( ) B. copy
- ( ) C. format
- ( ) D. reload

Your Answer: A. A. ping
Correct Answer: A. A. ping

Q179. Why should the configuration be saved after changes are made?

- (●) A. So changes are not lost after reboot
- ( ) B. To increase memory speed
- ( ) C. To delete old settings automatically
- ( ) D. To create new cables

Your Answer: A. A. So changes are not lost after reboot
Correct Answer: A. A. So changes are not lost after reboot

Q180. Which of the following is part of basic switch or router setup?

- (●) A. Setting the time zone
- ( ) B. Changing wallpaper
- ( ) C. Installing a mouse driver
- ( ) D. Adjusting screen brightness

Your Answer: A. A. Setting the time zone
Correct Answer: A. A. Setting the time zone

Q181. What is the main function of a router?

- ○ A. Connect devices within the same network only
- ◉ B. Forward packets between different networks
- ○ C. Display web pages
- ○ D. Assign file names

Your Answer: B. B. Forward packets between different networks
Correct Answer: B. B. Forward packets between different networks

Q182. What is the main function of a switch?

- ◉ A. Connect devices within a LAN
- ○ B. Route packets to the Internet only
- ○ C. Translate domain names
- ○ D. Encrypt email messages

Your Answer: A. A. Connect devices within a LAN
Correct Answer: A. A. Connect devices within a LAN

Q183. Which device works primarily at Layer 2 of the OSI model?

- ○ A. Router
- ◉ B. Switch
- ○ C. Firewall
- ○ D. Modem

Your Answer: B. B. Switch
Correct Answer: B. B. Switch

Q184. Which device works primarily at Layer 3 of the OSI model?

- ○ A. Hub
- ○ B. Repeater
- ◉ C. Router
- ○ D. Switch

Your Answer: C. C. Router
Correct Answer: C. C. Router

Q185. Which command is used on Cisco devices to enter global configuration mode?

- ○ A. enable
- ◉ B. configure terminal
- ○ C. show running-config
- ○ D. copy startup-config running-config

Your Answer: B. B. configure terminal
Correct Answer: B. B. configure terminal

Q186. What is the purpose of assigning an IP address to a router interface?

- ○ A. To print logs
- ◉ B. To allow communication on that network segment
- ○ C. To increase cable length

○ D. To disable routing

Your Answer: B. B. To allow communication on that network segment
Correct Answer: B. B. To allow communication on that network segment

Q187. Which command is commonly used to display the status of switch ports?

○ A. show ip route

◉ B. show interfaces status

○ C. ping all

○ D. show vlan only

Your Answer: B. B. show interfaces status
Correct Answer: B. B. show interfaces status

Q188. What is a VLAN on a switch used for?

○ A. To physically move devices

◉ B. To logically separate networks

○ C. To increase voltage

○ D. To assign hostnames

Your Answer: B. B. To logically separate networks
Correct Answer: B. B. To logically separate networks

Q189. Which command is used to save the configuration on a Cisco router or switch?

○ A. save config

◉ B. write memory

- ○ C. run save
- ○ D. copy file config

Your Answer: B. B. write memory
Correct Answer: B. B. write memory

Q190. What does the default gateway on a switch or host usually refer to?

- ○ A. The MAC address of the switch
- ◉ B. The router interface used to reach other networks
- ○ C. The DNS server only
- ○ D. The IP address of the printer

Your Answer: B. B. The router interface used to reach other networks
Correct Answer: B. B. The router interface used to reach other networks

Q191. Which command is used to verify the routing table on a router?

- ◉ A. show ip route
- ○ B. show mac address-table
- ○ C. show version
- ○ D. show vlan brief

Your Answer: A. A. show ip route
Correct Answer: A. A. show ip route

Q192. What does a switch use to forward Ethernet frames?

- ○ A. IP address

- (●) B. MAC address
- ( ) C. Hostname
- ( ) D. DNS name

Your Answer: B. B. MAC address
Correct Answer: B. B. MAC address

Q193. Which type of switch port is used to carry traffic for multiple VLANs?

- ( ) A. Access port
- (●) B. Trunk port
- ( ) C. Console port
- ( ) D. AUX port

Your Answer: B. B. Trunk port
Correct Answer: B. B. Trunk port

Q194. What is the purpose of a router's routing table?

- ( ) A. To store user passwords
- (●) B. To determine the best path for packets
- ( ) C. To display VLAN names
- ( ) D. To block all traffic

Your Answer: B. B. To determine the best path for packets
Correct Answer: B. B. To determine the best path for packets

Q195. Why is switch configuration important in a network?

- ○ A. It prevents the need for cables
- ◉ B. It helps manage traffic, security, and VLANs
- ○ C. It replaces IP addressing
- ○ D. It eliminates routers

Your Answer: B. B. It helps manage traffic, security, and VLANs
Correct Answer: B. B. It helps manage traffic, security, and VLANs

Q196. What is the main purpose of Spanning Tree Protocol (STP)?

- ○ A. To assign IP addresses
- ◉ B. To prevent switching loops in a network
- ○ C. To encrypt data
- ○ D. To increase bandwidth

Your Answer: B. B. To prevent switching loops in a network
Correct Answer: B. B. To prevent switching loops in a network

Q197. Which network device is most closely associated with STP?

- ○ A. Router
- ◉ B. Switch
- ○ C. Modem
- ○ D. Firewall

Your Answer: B. B. Switch
Correct Answer: B. B. Switch

Q198. What problem can occur without STP in a redundant Layer 2 network?

- A. DNS failure
- B. Broadcast storm
- C. IP spoofing
- D. Cable burnout

Your Answer: B. B. Broadcast storm
Correct Answer: B. B. Broadcast storm

Q199. Which device is selected as the root bridge in STP?

- A. The switch with the highest MAC address
- B. The switch with the lowest Bridge ID
- C. The newest switch
- D. The switch with the fastest CPU

Your Answer: A. A. The switch with the highest MAC address
Correct Answer: B. B. The switch with the lowest Bridge ID

Q200. What is the purpose of the root bridge in STP?

- A. To block all traffic
- B. To serve as the reference point for the spanning tree
- C. To assign VLANs
- D. To route packets

Your Answer: B. B. To serve as the reference point for the spanning tree
Correct Answer: B. B. To serve as the reference point for the spanning tree

Q201. Which STP port state forwards frames and learns MAC addresses?

- ○ A. Blocking
- ○ B. Listening
- ○ C. Learning
- ◉ D. Forwarding

Your Answer: D. D. Forwarding
Correct Answer: D. D. Forwarding

Q202. Which STP port state prevents frame forwarding to avoid loops?

- ○ A. Forwarding
- ◉ B. Blocking
- ○ C. Learning
- ○ D. Routing

Your Answer: B. B. Blocking
Correct Answer: B. B. Blocking

Q203. What is the role of the STP root bridge?

- ○ A. It disables all switches
- ◉ B. It is the central reference for path calculation
- ○ C. It acts like a firewall
- ○ D. It assigns IP addresses

Your Answer: B. B. It is the central reference for path calculation
Correct Answer: B. B. It is the central reference for path calculation

Q204. What is a redundant link in a switched network?

- ○ A. A link used only for printing
- ◉ B. An extra path for backup if the main path fails
- ○ C. A cable that carries voice traffic only
- ○ D. A wireless connection

Your Answer: B. B. An extra path for backup if the main path fails
Correct Answer: B. B. An extra path for backup if the main path fails

Q205. Which STP feature helps recover connectivity if a link fails?

- ○ A. Blocking all ports
- ◉ B. Automatic recalculation of the topology
- ○ C. DHCP relay
- ○ D. IP fragmentation

Your Answer: B. B. Automatic recalculation of the topology
Correct Answer: B. B. Automatic recalculation of the topology

Q206. What does STP stand for?

- ○ A. Switch Transfer Protocol
- ◉ B. Spanning Tree Protocol
- ○ C. Secure Tunnel Process
- ○ D. System Traffic Protection

Your Answer: B. B. Spanning Tree Protocol
Correct Answer: B. B. Spanning Tree Protocol

Q207. What is the main benefit of STP in a Layer 2 network?

- ○ A. It reduces routing tables
- ◉ B. It prevents loops while keeping redundancy
- ○ C. It increases packet size
- ○ D. It disables switches

Your Answer: B. B. It prevents loops while keeping redundancy
Correct Answer: B. B. It prevents loops while keeping redundancy

Q208. Which protocol is an enhanced version of STP that converges faster?

- ○ A. RIP
- ◉ B. RSTP
- ○ C. ARP
- ○ D. FTP

Your Answer: B. B. RSTP
Correct Answer: B. B. RSTP

Q209. What does RSTP stand for?

- ◉ A. Rapid Spanning Tree Protocol
- ○ B. Routed Switching Transfer Protocol
- ○ C. Redundant System Traffic Path
- ○ D. Remote Spanning Tunnel Protocol

Your Answer: A. A. Rapid Spanning Tree Protocol
Correct Answer: A. A. Rapid Spanning Tree Protocol

Q210. What happens when STP detects a looped topology?

- ○ A. It increases the loop count
- ◉ B. It blocks some ports to remove the loop
- ○ C. It deletes VLANs
- ○ D. It changes IP addresses

Your Answer: B. B. It blocks some ports to remove the loop
Correct Answer: B. B. It blocks some ports to remove the loop

Q211. What is the first step in network troubleshooting?

- ○ A. Replace all devices
- ◉ B. Identify the problem
- ○ C. Reinstall the operating system
- ○ D. Change the IP range

Your Answer: B. B. Identify the problem
Correct Answer: B. B. Identify the problem

Q212. Which command is commonly used to test basic network connectivity?

- ◉ A. ping
- ○ B. format
- ○ C. mkdir
- ○ D. nslookup

Your Answer: A. A. ping
Correct Answer: A. A. ping

Q213. Which command is used to show the path packets take to reach a destination?

- (●) A. tracert/traceroute
- ( ) B. ping
- ( ) C. ipconfig
- ( ) D. netstat

Your Answer: A. A. tracert/traceroute
Correct Answer: A. A. tracert/traceroute

Q214. Which tool is used to display IP configuration details on Windows?

- (●) A. ipconfig
- ( ) B. ping
- ( ) C. telnet
- ( ) D. route

Your Answer: A. A. ipconfig
Correct Answer: A. A. ipconfig

Q215. What does DNS troubleshooting often involve?

- ( ) A. Checking cables only
- (●) B. Verifying name resolution
- ( ) C. Changing monitor settings
- ( ) D. Defragmenting disks

Your Answer: B. B. Verifying name resolution

Correct Answer: B. B. Verifying name resolution

Q216. If a device cannot access other networks, which setting should be checked first?

- ○ A. Wallpaper
- ◉ B. Default gateway
- ○ C. Screen saver
- ○ D. CPU fan speed

Your Answer: B. B. Default gateway
Correct Answer: B. B. Default gateway

Q217. Which command checks active connections and listening ports?

- ○ A. netstat
- ◉ B. ping
- ○ C. tracert
- ○ D. nslookup

Your Answer: B. B. ping
Correct Answer: A. A. netstat

Q218. What is a common cause of network connectivity failure?

- ◉ A. Loose cable connection
- ○ B. Bright screen
- ○ C. Low printer ink
- ○ D. Old keyboard

Your Answer: A. A. Loose cable connection
Correct Answer: A. A. Loose cable connection

Q219. Which tool is useful for testing whether a domain name resolves correctly?

- (●) A. nslookup
- ( ) B. copy
- ( ) C. shutdown
- ( ) D. arp

Your Answer: A. A. nslookup
Correct Answer: A. A. nslookup

Q220. What should be checked if a device has an IP address but cannot communicate on the LAN?

- (●) A. Subnet mask
- ( ) B. Wallpaper
- ( ) C. CPU temperature only
- ( ) D. File format

Your Answer: A. A. Subnet mask
Correct Answer: A. A. Subnet mask

Q221. Which layer of the OSI model is often examined when troubleshooting cable issues?

- ( ) A. Application
- (●) B. Physical
- ( ) C. Session

○ D. Presentation

Your Answer: B. B. Physical
Correct Answer: B. B. Physical

Q222. Which layer is often checked when troubleshooting IP routing problems?

○ A. Physical

○ B. Data Link

◉ C. Network

○ D. Application

Your Answer: C. C. Network
Correct Answer: C. C. Network

Q223. What does a successful ping test confirm?

○ A. DNS always works

◉ B. Basic connectivity to the destination

○ C. Firewall is disabled

○ D. The device has internet access always

Your Answer: B. B. Basic connectivity to the destination
Correct Answer: B. B. Basic connectivity to the destination

Q224. What is a common troubleshooting method used in networking?

○ A. Trial and error only

◉ B. OSI model approach

- ○ C. Random rebooting only
- ○ D. Deleting all settings

Your Answer: B. B. OSI model approach
Correct Answer: B. B. OSI model approach

Q225. Which of the following can cause slow network performance?

- ◉ A. Network congestion
- ○ B. Correct subnet mask
- ○ C. Strong password
- ○ D. Proper routing

Your Answer: A. A. Network congestion
Correct Answer: A. A. Network congestion

Q226. What is a VLAN?

- ○ A. A physical cable type
- ◉ B. A logical segmentation of a network
- ○ C. A routing protocol
- ○ D. A type of firewall

Your Answer: B. B. A logical segmentation of a network
Correct Answer: B. B. A logical segmentation of a network

Q227. What is the main purpose of a VLAN?

- ○ A. To increase cable length
- ◉ B. To separate network traffic logically

○ C. To assign public IP addresses

○ D. To replace switches

Your Answer: B. B. To separate network traffic logically
Correct Answer: B. B. To separate network traffic logically

Q228. VLANs operate at which OSI layer?

○ A. Layer 1

◉ B. Layer 2

○ C. Layer 3

○ D. Layer 4

Your Answer: B. B. Layer 2
Correct Answer: B. B. Layer 2

Q229. Which of the following is a benefit of using VLANs?

○ A. They increase broadcast traffic

◉ B. They improve security and reduce broadcasts

○ C. They remove the need for routers completely

○ D. They disable switching loops

Your Answer: B. B. They improve security and reduce broadcasts
Correct Answer: B. B. They improve security and reduce broadcasts

Q230. What is a broadcast domain?

○ A. A group of routers

◉ B. A network area where broadcast frames are forwarded

○ C. A type of IP address

○ D. A wireless frequency range

Your Answer: B. B. A network area where broadcast frames are forwarded
Correct Answer: B. B. A network area where broadcast frames are forwarded

Q231. How do VLANs help network performance?

○ A. By increasing packet size

◉ B. By reducing unnecessary broadcast traffic

○ C. By eliminating all traffic

○ D. By slowing down the network

Your Answer: B. B. By reducing unnecessary broadcast traffic
Correct Answer: B. B. By reducing unnecessary broadcast traffic

Q232. Which port type connects an end device to a single VLAN?

○ A. Trunk port

◉ B. Access port

○ C. Console port

○ D. EtherChannel port

Your Answer: B. B. Access port
Correct Answer: B. B. Access port

Q233. Which port type carries traffic for multiple VLANs?

○ A. Access port

◉ B. Trunk port

- ○ C. Management port
- ○ D. Loopback port

Your Answer: B. B. Trunk port
Correct Answer: B. B. Trunk port

Q234. What is the default VLAN on many switches?

- ◉ A. VLAN 1
- ○ B. VLAN 10
- ○ C. VLAN 100
- ○ D. VLAN 4095

Your Answer: A. A. VLAN 1
Correct Answer: A. A. VLAN 1

Q235. What happens when devices are placed in different VLANs?

- ○ A. They can communicate without any routing
- ◉ B. They are separated into different logical networks
- ○ C. They share the same broadcast domain
- ○ D. They use the same MAC address

Your Answer: B. B. They are separated into different logical networks
Correct Answer: B. B. They are separated into different logical networks

Q236. What is inter-VLAN routing?

- ◉ A. Routing between VLANs
- ○ B. Routing within one switch only

- ○ C. Routing over the Internet only
- ○ D. Routing without IP addresses

Your Answer: A. A. Routing between VLANs
Correct Answer: A. A. Routing between VLANs

Q237. Which device is typically required for communication between VLANs?

- ○ A. Hub
- ◉ B. Router or Layer 3 switch
- ○ C. Repeater
- ○ D. Modem

Your Answer: B. B. Router or Layer 3 switch
Correct Answer: B. B. Router or Layer 3 switch

Q238. What is the main reason to create separate VLANs for departments like HR and Finance?

- ○ A. To make printers faster
- ◉ B. To improve security and organization
- ○ C. To increase cable cost
- ○ D. To disable routing

Your Answer: B. B. To improve security and organization
Correct Answer: B. B. To improve security and organization

Q239. Which statement about VLANs is correct?

- ○ A. VLANs require separate physical switches for each group

- ◉ B. VLANs can be created on a single switch to segment traffic
- ○ C. VLANs work only on wireless networks
- ○ D. VLANs eliminate the need for IP addressing

Your Answer: B. B. VLANs can be created on a single switch to segment traffic
Correct Answer: B. B. VLANs can be created on a single switch to segment traffic

Q240. Which of the following is a common VLAN tagging standard?

- ◉ A. IEEE 802.1Q
- ○ B. IEEE 802.3u
- ○ C. IEEE 802.11
- ○ D. IEEE 802.15

Your Answer: A. A. IEEE 802.1Q
Correct Answer: A. A. IEEE 802.1Q

Q241. What is VTP used for?

- ◉ A. Managing VLAN information across switches
- ○ B. Assigning IP addresses automatically
- ○ C. Routing packets between networks
- ○ D. Encrypting wireless traffic

Your Answer: A. A. Managing VLAN information across switches
Correct Answer: A. A. Managing VLAN information across switches

Q242. What does VTP stand for?

- ○ A. Virtual Transfer Protocol

- (●) B. VLAN Trunking Protocol
- ( ) C. Verified Trunking Process
- ( ) D. Variable Traffic Protocol

Your Answer: B. B. VLAN Trunking Protocol
Correct Answer: B. B. VLAN Trunking Protocol

Q243. Which device type primarily shares VLAN information using VTP?

- ( ) A. Routers
- (●) B. Switches
- ( ) C. Firewalls
- ( ) D. Modems

Your Answer: B. B. Switches
Correct Answer: B. B. Switches

Q244. What is a VTP domain?

- (●) A. A group of switches sharing the same VLAN information
- ( ) B. A group of routers sharing routing tables
- ( ) C. A group of hosts using the same IP address
- ( ) D. A wireless coverage area

Your Answer: A. A. A group of switches sharing the same VLAN information
Correct Answer: A. A. A group of switches sharing the same VLAN information

Q245. Which VTP mode can create, modify, and delete VLANs?

- ○ A. Client
- ○ B. Transparent
- ◉ C. Server
- ○ D. Monitor

Your Answer: C. C. Server
Correct Answer: C. C. Server

Q246. Which VTP mode receives VLAN updates but cannot make changes?

- ○ A. Server
- ◉ B. Client
- ○ C. Transparent
- ○ D. Root

Your Answer: B. B. Client
Correct Answer: B. B. Client

Q247. Which VTP mode forwards VTP advertisements but does not synchronize VLAN database?

- ○ A. Server
- ○ B. Client
- ◉ C. Transparent
- ○ D. Access

Your Answer: C. C. Transparent
Correct Answer: C. C. Transparent

Q248. What is a VTP advertisement?

- (●) A. A broadcast message that carries VLAN information
- ( ) B. A firewall rule
- ( ) C. A router configuration backup
- ( ) D. An IP packet used for routing

Your Answer: A. A. A broadcast message that carries VLAN information
Correct Answer: A. A. A broadcast message that carries VLAN information

Q249. Why is VTP useful in large networks?

- (●) A. It allows centralized VLAN management
- ( ) B. It removes the need for switches
- ( ) C. It increases cable length
- ( ) D. It disables VLANs

Your Answer: A. A. It allows centralized VLAN management
Correct Answer: A. A. It allows centralized VLAN management

Q250. What can happen if VTP is misconfigured?

- (●) A. VLAN information may be lost or overwritten
- ( ) B. Internet speed always increases
- ( ) C. Routers stop working permanently
- ( ) D. IP addresses become static

Your Answer: A. A. VLAN information may be lost or overwritten
Correct Answer: A. A. VLAN information may be lost or overwritten

Q251. Which VTP version supports extended VLANs better in newer Cisco environments?

- ○ A. VTPv1
- ○ B. VTPv2 only
- ◉ C. VTPv3
- ○ D. VTPv0

Your Answer: C. C. VTPv3
Correct Answer: C. C. VTPv3

Q252. What is typically required for switches to exchange VTP information?

- ○ A. Same VLAN database only
- ◉ B. Same VTP domain name
- ○ C. Same IP subnet only
- ○ D. Same router model

Your Answer: B. B. Same VTP domain name
Correct Answer: B. B. Same VTP domain name

Q253. What is the main advantage of using VTP?

- ○ A. It eliminates trunk ports
- ◉ B. It simplifies VLAN administration
- ○ C. It replaces spanning tree
- ○ D. It blocks all broadcast traffic

Your Answer: B. B. It simplifies VLAN administration

Correct Answer: B. B. It simplifies VLAN administration

Q254. Which of the following is true about VTP client mode?

- ○ A. It can create new VLANs
- ○ B. It stores VLANs locally and does not learn from others
- ◉ C. It only receives VLAN updates
- ○ D. It acts like a router

Your Answer: C. C. It only receives VLAN updates
Correct Answer: C. C. It only receives VLAN updates

Q255. Which command is commonly used on Cisco switches to display VTP status?

- ◉ A. show vtp status
- ○ B. show vlan brief
- ○ C. show ip route
- ○ D. show interfaces trunk

Your Answer: A. A. show vtp status
Correct Answer: A. A. show vtp status

Q256. What is a WAN?

- ○ A. A network within one room
- ◉ B. A network that connects devices over large geographic areas
- ○ C. A network used only for printers
- ○ D. A wireless keyboard connection

Your Answer: B. B. A network that connects devices over large geographic areas
Correct Answer: B. B. A network that connects devices over large geographic areas

Q257. Which of the following is an example of a WAN?

- ○ A. Home Wi-Fi
- ○ B. Office LAN
- ◉ C. The Internet
- ○ D. Bluetooth connection

Your Answer: C. C. The Internet
Correct Answer: C. C. The Internet

Q258. WANs typically connect:

- ◉ A. Multiple LANs
- ○ B. Only one switch
- ○ C. Only one computer
- ○ D. Only wireless printers

Your Answer: A. A. Multiple LANs
Correct Answer: A. A. Multiple LANs

Q259. What is one common goal in WAN design?

- ◉ A. Reduce long-distance communication cost
- ○ B. Eliminate routers
- ○ C. Increase cable length without limit

- ○ D. Prevent all data transfer

Your Answer: A. A. Reduce long-distance communication cost
Correct Answer: A. A. Reduce long-distance communication cost

Q260. Which device is commonly used to connect a LAN to a WAN?

- ○ A. Switch
- ◉ B. Router
- ○ C. Hub
- ○ D. Repeater

Your Answer: B. B. Router
Correct Answer: B. B. Router

Q261. Which technology is often used in WAN links?

- ○ A. Ethernet only
- ◉ B. Leased lines
- ○ C. Keyboard cables
- ○ D. HDMI cables

Your Answer: B. B. Leased lines
Correct Answer: B. B. Leased lines

Q262. Which of the following is a characteristic of WANs?

- ○ A. Very small coverage area
- ◉ B. High latency compared to LANs
- ○ C. No routing required

○ D. No security concerns

Your Answer: B. B. High latency compared to LANs
Correct Answer: B. B. High latency compared to LANs

Q263. Which protocol is commonly used in WAN connections for point-to-point links?

◉ A. PPP

○ B. ARP

○ C. SMTP

○ D. FTP

Your Answer: A. A. PPP
Correct Answer: A. A. PPP

Q264. What does PPP stand for?

○ A. Public Packet Path

◉ B. Point-to-Point Protocol

○ C. Private Path Processing

○ D. Packet Port Protocol

Your Answer: B. B. Point-to-Point Protocol
Correct Answer: B. B. Point-to-Point Protocol

Q265. Which WAN design consideration is most important for business continuity?

○ A. Screen size

◉ B. Redundancy

○ C. Keyboard layout

○ D. Printer speed

Your Answer: B. B. Redundancy
Correct Answer: B. B. Redundancy

Q266. Which of the following is a WAN service provider?

◉ A. ISP

○ B. DHCP

○ C. DNS

○ D. VLAN

Your Answer: A. A. ISP
Correct Answer: A. A. ISP

Q267. Which WAN topology connects multiple sites to a central hub location?

○ A. Ring

◉ B. Star

○ C. Bus

○ D. Full mesh

Your Answer: B. B. Star
Correct Answer: B. B. Star

Q268. Which WAN topology provides the highest redundancy?

○ A. Bus

- ◉ B. Full mesh
- ○ C. Star
- ○ D. Daisy chain

Your Answer: B. B. Full mesh
Correct Answer: B. B. Full mesh

Q269. What is a disadvantage of WANs compared to LANs?

- ○ A. They are always faster
- ◉ B. They are usually more expensive to build and maintain
- ○ C. They do not need routers
- ○ D. They use no protocols

Your Answer: B. B. They are usually more expensive to build and maintain
Correct Answer: B. B. They are usually more expensive to build and maintain

Q270. What is the primary purpose of WAN design?

- ◉ A. Connect users across large distances reliably
- ○ B. Connect only devices in one office
- ○ C. Replace local switches
- ○ D. Remove the need for IP addressing

Your Answer: A. A. Connect users across large distances reliably
Correct Answer: A. A. Connect users across large distances reliably

Q271. What is the main advantage of wireless network design?

- ○ A. It requires no devices

- [x] B. It provides mobility and flexibility
- [ ] C. It eliminates security risks
- [ ] D. It always has unlimited speed

Your Answer: B. B. It provides mobility and flexibility
Correct Answer: B. B. It provides mobility and flexibility

Q272. Which device is central to a wireless network design?

- [ ] A. Router only
- [x] B. Access point
- [ ] C. Hub
- [ ] D. Repeater only

Your Answer: B. B. Access point
Correct Answer: B. B. Access point

Q273. What does an access point do?

- [x] A. Converts wireless signals to connect devices to the network
- [ ] B. Assigns MAC addresses
- [ ] C. Encrypts hard drives
- [ ] D. Prints documents

Your Answer: A. A. Converts wireless signals to connect devices to the network
Correct Answer: A. A. Converts wireless signals to connect devices to the network

Q274. Which factor most affects wireless coverage?

- [ ] A. Monitor brightness

- ◉ B. Access point placement
- ○ C. Keyboard type
- ○ D. CPU speed

Your Answer: B. B. Access point placement
Correct Answer: B. B. Access point placement

Q275. Which frequency band is commonly used in Wi-Fi?

- ◉ A. 2.4 GHz
- ○ B. 100 MHz
- ○ C. 10 GHz only
- ○ D. 500 MHz

Your Answer: A. A. 2.4 GHz
Correct Answer: A. A. 2.4 GHz

Q276. Which of the following is also commonly used in Wi-Fi?

- ◉ A. 5 GHz
- ○ B. 15 MHz
- ○ C. 60 kHz
- ○ D. 200 MHz

Your Answer: A. A. 5 GHz
Correct Answer: A. A. 5 GHz

Q277. What is interference in a wireless network?

- ○ A. A file transfer error

- ◉ B. Signal disruption from other devices or networks
- ○ C. A router reboot
- ○ D. A DNS failure only

Your Answer: B. B. Signal disruption from other devices or networks
Correct Answer: B. B. Signal disruption from other devices or networks

Q278. Which security method is commonly used in wireless networks?

- ◉ A. WPA2/WPA3
- ○ B. FTP
- ○ C. SNMP
- ○ D. ARP

Your Answer: A. A. WPA2/WPA3
Correct Answer: A. A. WPA2/WPA3

Q279. Why is channel planning important in wireless design?

- ◉ A. To reduce wireless interference
- ○ B. To increase monitor resolution
- ○ C. To change IP addresses
- ○ D. To replace encryption

Your Answer: A. A. To reduce wireless interference
Correct Answer: A. A. To reduce wireless interference

Q280. Which of the following can weaken wireless signals?

- ◉ A. Thick walls

- ○ B. Proper AP placement
- ○ C. Strong encryption
- ○ D. Updated firmware

Your Answer: A. A. Thick walls
Correct Answer: A. A. Thick walls

Q281. What does SSID stand for?

- ○ A. Secure Signal ID
- ◉ B. Service Set Identifier
- ○ C. System Security Internet Domain
- ○ D. Signal Strength Index Device

Your Answer: B. B. Service Set Identifier
Correct Answer: B. B. Service Set Identifier

Q282. What is roaming in wireless networking?

- ◉ A. Moving between different wireless access points while staying connected
- ○ B. Changing the router's IP address
- ○ C. Turning off Wi-Fi security
- ○ D. Increasing the antenna size

Your Answer: A. A. Moving between different wireless access points while staying connected
Correct Answer: A. A. Moving between different wireless access points while staying connected

Q283. Which device extends wireless coverage to a larger area?

- (●) A. Repeater or range extender
- ( ) B. Printer
- ( ) C. Scanner
- ( ) D. Hub

Your Answer: A. A. Repeater or range extender
Correct Answer: A. A. Repeater or range extender

Q284. What is a major security concern in wireless network design?

- (●) A. Unauthorized access
- ( ) B. Keyboard failure
- ( ) C. Cable overheating
- ( ) D. Disk fragmentation

Your Answer: A. A. Unauthorized access
Correct Answer: A. A. Unauthorized access

Q285. Which standard is commonly used for wireless LANs?

- (●) A. IEEE 802.11
- ( ) B. IEEE 802.3
- ( ) C. IEEE 802.1D
- ( ) D. IEEE 802.15 only

Your Answer: A. A. IEEE 802.11
Correct Answer: A. A. IEEE 802.11

Q286. What does WLAN stand for?

- ○ A. Wireless Local Access Network
- ○ B. Wired Local Area Network
- ◉ C. Wireless Local Area Network
- ○ D. Wide Link Access Network

Your Answer: C. C. Wireless Local Area Network
Correct Answer: C. C. Wireless Local Area Network

Q287. Which standard is commonly used for WLANs?

- ○ A. IEEE 802.3
- ◉ B. IEEE 802.11
- ○ C. IEEE 802.1Q
- ○ D. IEEE 802.16

Your Answer: B. B. IEEE 802.11
Correct Answer: B. B. IEEE 802.11

Q288. What is the main purpose of a WLAN?

- ◉ A. To connect devices using wireless communication
- ○ B. To replace the Internet
- ○ C. To assign public IP addresses
- ○ D. To block all network traffic

Your Answer: A. A. To connect devices using wireless communication
Correct Answer: A. A. To connect devices using wireless communication

Q289. Which device is essential in a WLAN?

- (●) A. Access point
- ( ) B. Hub only
- ( ) C. Plotter
- ( ) D. Modem only

Your Answer: A. A. Access point
Correct Answer: A. A. Access point

Q290. What does a wireless access point do in a WLAN?

- (●) A. Connects wireless clients to the wired network
- ( ) B. Stores DNS records
- ( ) C. Assigns VLAN tags
- ( ) D. Encrypts hard drives

Your Answer: A. A. Connects wireless clients to the wired network
Correct Answer: A. A. Connects wireless clients to the wired network

Q291. Which security protocol is commonly used in WLANs?

- (●) A. WPA2/WPA3
- ( ) B. HTTP
- ( ) C. FTP
- ( ) D. SNMP

Your Answer: A. A. WPA2/WPA3
Correct Answer: A. A. WPA2/WPA3

Q292. What is SSID in a WLAN?

- ○ A. System Signal Internet Device
- ◉ B. Service Set Identifier
- ○ C. Secure Switch Interface Device
- ○ D. Standard Security ID

Your Answer: B. B. Service Set Identifier
Correct Answer: B. B. Service Set Identifier

Q293. Why is site survey important in WLAN implementation?

- ◉ A. To choose the best access point locations
- ○ B. To change IP addresses
- ○ C. To format hard drives
- ○ D. To uninstall drivers

Your Answer: A. A. To choose the best access point locations
Correct Answer: A. A. To choose the best access point locations

Q294. Which frequency bands are commonly used in WLANs?

- ◉ A. 2.4 GHz and 5 GHz
- ○ B. 10 MHz and 20 MHz
- ○ C. 100 MHz and 200 MHz
- ○ D. 1 GHz and 20 GHz

Your Answer: A. A. 2.4 GHz and 5 GHz
Correct Answer: A. A. 2.4 GHz and 5 GHz

Q295. What is channel overlap in WLAN design?

- ○ A. Using two devices with same MAC address
- ◉ B. Interference caused by nearby wireless channels
- ○ C. A wired cable fault
- ○ D. IP conflict on a router

Your Answer: B. B. Interference caused by nearby wireless channels
Correct Answer: B. B. Interference caused by nearby wireless channels

Q296. Which of the following can improve WLAN performance?

- ◉ A. Proper AP placement
- ○ B. Weak encryption
- ○ C. Too many overlapping channels
- ○ D. Poor antenna choice

Your Answer: A. A. Proper AP placement
Correct Answer: A. A. Proper AP placement

Q297. What is the purpose of authentication in WLANs?

- ◉ A. To allow only authorized users to connect
- ○ B. To increase signal power
- ○ C. To assign router names
- ○ D. To block SSID broadcasts

Your Answer: A. A. To allow only authorized users to connect
Correct Answer: A. A. To allow only authorized users to connect

Q298. Which WLAN feature helps users stay connected while moving?

- (●) A. Roaming
- ( ) B. Trunking
- ( ) C. Routing
- ( ) D. NAT

Your Answer: A. A. Roaming
Correct Answer: A. A. Roaming

Q299. What is one common implementation issue in WLANs?

- (●) A. Signal interference
- ( ) B. Incorrect printer settings
- ( ) C. Wrong keyboard layout
- ( ) D. Software licensing

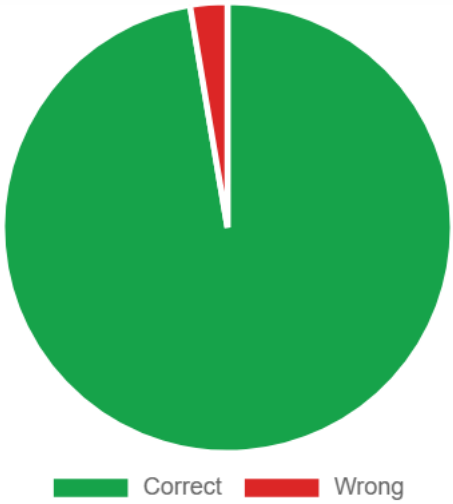

Your Answer: A. A. Signal interference
Correct Answer: A. A. Signal interference

Q300. What is the primary goal of WLAN design and implementation?

- (●) A. To provide secure, reliable wireless connectivity
- ( ) B. To remove all network cables from the world
- ( ) C. To eliminate the need for access points
- ( ) D. To replace all routers with hubs

Your Answer: A. A. To provide secure, reliable wireless connectivity
Correct Answer: A. A. To provide secure, reliable wireless connectivity
